PROFILE

Cloud & DevOps Engineering student specialized in cloud-native application delivery, infrastructure automation, and scalable platform design. Experienced in containerization, Kubernetes orchestration, Jenkins CI/CD pipelines, OpenStack infrastructure, Linux administration, and monitoring. Combines a strong software engineering background with DevOps practices to build secure, automated, and production-ready systems. Seeking to contribute to modern cloud, DevOps, or platform engineering teams.

EDUCATION

ESPRIT – École Supérieure Privée d'Ingénierie et de Technologies — Ariana, Tunisia
Engineering Degree in Cloud & DevOps — Sep 2023 – Present

ISITCOM – Institut Supérieur d'Informatique — Hammam Sousse, Tunisia
Bachelor in Computer Science — Sep 2021 – Jun 2023

Lycée El Manar — Kasserine, Tunisia
Baccalauréat – Sciences Mathématiques — 2020 – 2021

EXPERIENCE

AL IDHAFA GROUP — Tunis, Tunisia
Full-Stack Developer Intern — Jul 2025 – Aug 2025

- Designed modular REST APIs in Spring Boot and Angular components with JWT role-based access control.
- Built a professional Showroom space for car dealers and integrated Stripe Checkout for secure payments.
- Added AI features: background removal via Rembg and embedded LLM assistant using Gemma 1B via Ollama.
- Containerized all services with Docker; modeled and optimized PostgreSQL schema.

ABAJIM — Sousse, Tunisia
Mobile Developer Intern — Feb 2024 – Jun 2024

- Built a React Native accessibility app for visually impaired users with intuitive low-vision UI.
- Integrated OCR API for text extraction from PDFs and images, and TTS API for audio conversion.
- Developed Node.js backend with MongoDB for processing and data management.

TECHNICAL SKILLS

Cloud & Infrastructure: AWS (EC2, VPC, S3, IAM), OpenStack, Virtualization (KVM, Hyper-V)
DevOps & IaC: Terraform, Ansible, Docker, Kubernetes, Docker Swarm
CI/CD & Automation: Jenkins, GitHub Actions
Monitoring & Observability: Prometheus, Grafana, Zabbix, Loki, Alertmanager
Operating Systems & Administration: Linux (Ubuntu, CentOS, RHEL), SSH, Server Security, Network Administration
Programming Languages: Java, Python, JavaScript, C
Backend Development: Spring Boot, Node.js, Express.js, Flask, Symfony
Frontend & Mobile: Angular, React, React Native, HTML, CSS, JavaFX
Databases: PostgreSQL, MySQL, MongoDB, MariaDB
Software Architecture: Microservices, MVC
Machine Learning & Data Analysis: scikit-learn, pandas, NumPy, Data Preparation, Supervised Learning

KEY PROJECTS

GitOps EKS Platform – Cloud & DevOps Project | AWS, Terraform, Amazon EKS, ECR, Docker, Kubernetes, GitHub Actions, Argo CD, Prometheus, Grafana, Trivy, Cosign

- Provisioned AWS infrastructure (VPC, EKS, IAM, ECR) using modular Terraform configurations.
- Implemented CI/CD pipelines with GitHub Actions, AWS OIDC authentication, Trivy vulnerability scanning, and SBOM generation.
- Automated Kubernetes deployments using Argo CD and GitOps practices, with progressive delivery using Argo Rollouts.
- Integrated monitoring and observability with Prometheus, Grafana, Loki, and Alertmanager.

DevOps Observability Platform | Spring Boot, Kubernetes (kind), Prometheus, Grafana, Loki, Jenkins, ArgoCD, Terraform, Docker Hub, Helm

◦ Deployed 3 microservices on a kind Kubernetes cluster with Prometheus/Grafana monitoring and centralized logging via Loki/Promtail (Helm).
◦ Jenkins CI/CD pipeline with DevSecOps scanning (Gitleaks, Trivy) and automated GitOps deployment via ArgoCD.
◦ Provisioned cloud infrastructure AWS with Terraform.

CityVoice – Civic Engagement Platform | *Spring Boot, Angular, Kubernetes, OpenStack, Jenkins, Docker, WebSocket*
◦ Provisioned full IaaS infrastructure on OpenStack (Nova, Neutron, Heat, Octavia, Zabbix) and automated K8s cluster via Ansible with 7 professional roles.
◦ Built Jenkins CI/CD pipeline with GitHub webhooks; exposed platform publicly via Cloudflare Tunnel on custom domain.
◦ Implemented JWT + OAuth2, AI name screening via Groq (LLaMA 3), photo moderation with Google Cloud Vision, and real-time WebSocket notifications.
◦ Admin dashboard with Chart.js analytics, risk scoring, gamification engine (points, badges, trust levels).

Dawrek – Clinic Queue Management SaaS | *Node.js, React, Socket.io, PostgreSQL, Redis, Twilio, Vercel*
◦ Built real-time patient queue tracking via Socket.io with live session management for Tunisian medical clinics.
◦ Integrated Twilio SMS notifications with Tunisian phone normalization and AR/FR multilingual support.
◦ Deployed on Vercel + Render + Supabase (PostgreSQL) + Upstash (Redis) with TLS.

Carnova – Automotive Marketplace | *Spring Boot, Angular, PostgreSQL, Docker, Stripe, Ollama*
◦ Developed intelligent car marketplace with professional Showroom for dealers and Stripe Checkout integration.
◦ Added AI background removal via Rembg and embedded LLM assistant powered by Gemma 1B via Ollama.

Automotive ML Prediction & Recommendation System | *Python, scikit-learn, pandas, Flask*
◦ Built full ML pipeline: data cleaning, EDA, clustering, supervised models for price prediction, fuel type classification and horsepower estimation.
◦ Designed budget-based vehicle recommender and deployed as interactive Flask web app with live predictions.

Sabeel – Agricultural Supervision Platform | *Symfony, JavaFX, MySQL, Git*
◦ Designed a digital platform for remote agricultural supervision with centralized management of crops, equipment and resources with real-time tracking.
◦ Built full Symfony web app with supervision dashboard, plus a JavaFX desktop app adapted for offline environments.
◦ Integrated worker recruitment module and specialist advisory access for agricultural teams.

LANGUAGES

◦ Arabic (native)
◦ French (fluent)
◦ English (fluent)
